

Analytical Scientist/Senior Analytical Scientist

Position Summary:

Cellics Therapeutics is seeking an Analytical Scientist/Senior Analytical Scientist (level dependent on experience) to join the Analytical Development and QC Team. The scientist will be responsible for developing, performing, and qualifying analytical methods in support of the release and stability programs for DS/DP. This is a multi-functional role in an agile and fast-paced environment.

Essential Duties and Responsibilities:

- Perform analytical method development, qualification, and validation for biologics products.
- Collaborate with internal and external partners to design and execute analytical studies to enable process development, stability, pre-clinical, and clinical programs.
- Author and review corresponding CMC sections in regulatory filings and responses.
- Author and review analytical study reports.
- Other tasks as needed.

Qualifications:

- Ph.D. in Biochemistry, Chemistry, Chemical engineering or related discipline with 1+ year of experience, M.S. with 5+ years of experience, and B.S. with 7+ years of experience in Biotechnology or Pharmaceutical Industry. Candidates with advanced degrees are preferred.
- Hands-on experience in analytical method development and biologics product characterization required.
- Chromatography experience (HPLC/UPLC/CE) required.

- In-depth knowledge in large molecule analytics highly desirable.
- Experience in biologics regulatory submissions (IND, BLA) desirable.
- Excellent problem-solving skills and verbal and written communication skills.
- Self-motivated and goal-oriented.
- Able to thrive in a fast-paced and dynamic environment.
